

FIGHT BACK CRIME, ONE CAMERA AT A TIME PROMOTION

Who is Alarm.com?

Alarm.com is an innovative security offering that lets you monitor and control your home or business security system from anywhere, at any time.

Alarm.com Advantages:

* **SECURITY:** Alarm.com's 100% wireless communication ensures that even if the phone line, power or internet connection is cut, alarm signals are still sent.

* **AWARENESS:** Real-time email/text notifications let you know when there is any activity at their property, even when the security system is disarmed. With Alarm.com you can keep track of activity on entry doors, windows, liquor and medicine cabinets, safes, drawers, and more.

* **CONTROL:** Alarm.com's user-friendly web interface enables you to remotely arm and disarm the system, control lights, appliances, thermostats and door locks, program panel user codes, and monitor system activity from any web-enabled computer or mobile device. You can also sign up for real-time text and email alerts to find out about any type of system activity that matters to you.

Alarm.com Product Offerings:

.EmPOWER HOME AUTOMATION: With emPOWER by Alarm.com, you can have remote control and intelligent automation of lights, appliances, thermostats and door locks, giving you the ability to make smarter energy decisions more conveniently.

* **EZ-INSTALL VIDEO:** You can use cameras inside to check up on kids, pets and visitors, or point them outside to see activity on or around their property. Each Alarm.com camera includes built-in Wi-Fi or Ethernet connectivity and requires only a high-speed Internet connection and a power outlet -- no need to install any software or local storage devices.

* **CRASH & SMASH PROTECTION:** Alarm.com's patented "Crash & Smash" detection technology provides an even higher level of security for any home or business property, ensuring that even if an intruder is able to locate and disable the control panel in a "Crash & Smash" attack, Alarm.com will still be able to send a signal to the central station for help.

* **MOBILE APPS:** Alarm.com offers mobile apps for any web-enabled cell phone or smartphone, including iPhone, BlackBerry and Android devices.
